PCN: New Apogee Series Gyro Range

SBG Systems

1, av Eiffel
78420 - Carrières sur Seine - FRANCE

This notice is to inform you about a minor Apogee series hardware change, as the gyro range increases from 100°/s to 200°/s.

1. Description of change

Apogee series were introduced with an initial gyro range of 100°/s. All Apogee units with product codes similar to APOGEE-#-G2A# include a 100°/s range gyro. Thanks to deep testing, SBG Systems has fully qualified gyroscopes in their 200°/s range.

2. Impact of change

SBG Systems has taken all actions to make sure that the transition will be seamless for all users.

Only the product code is affected by the change as all performance parameters have been re-evaluated and confirmed to the initial specification. Moreover, the new gyro range is proposed at the same price as previous version.

New Apogee series product codes are the following: APOGEE-[A/E/N/D/M/U]-G3A[1/3]

3. G2 hardware EOL announcement

Because the full performance and functionality is ensured, the Apogee series in its A2 range is immediately put in End-of-Life, with no possibility to order further units. As of Jul 10, 2017, any new purchase order or repair request will be processed and acknowledged using the new G3 gyro range instead.

3.1. New hardware availability

New Apogee gyro range is already available and in stock, with a lead time of 3-5 weeks.

4. Contact
